

Vacu-Storr

High Vacuum Storage Vessels

The VACU-STORR series of vacuum containers were developed to store materials which are sensitive to moisture, oxygen, and other gases found in the environment. The VACU-STORR is capable of reaching the 10^{-6} torr vacuum level using appropriate vacuum pumps, and maintaining a high degree of vacuum for years (see data). Far superior to currently available vacuum dessicators or glove boxes, which are constructed of high out-gassing rate materials and poor vacuum seal design, the VACU-STORR is a reliable means of safeguarding your materials for *long* periods of time.

Size	ID	Height
4.5" (125mm)	66	80
6" (150mm)	95	150
8" (200mm)	150	175

STAINLESS STEEL CONTAINER for CF FLANGE MOUNTED DEVICES

- 5 Year Holding Time to 0.1 Atm
- Reaches 10^{-6} Torr!
